DBMS 4A README

CS18B004,CS18B005,CS18B010,CS18B029,CS18B057

- The folder contains the script file 'script.py' and the README.pdf

Input Format:

- There are two types of queries : Addition , Enrollment

  Type- 1: (Addition query)

  Query format:

  Addition D C T r

  where D = department ID,
         C = Course ID.
         T = Teacher ID,
         R = room

  Type-2 : (Enrollment query)

  Query format:

  Enrollment r c

  Where r = roll number of the student
         C = course id.

- The script performs validations on the given data and either performs the operation or throws an exception at the terminal.

- The program keeps waiting for the next command in an infinite loop, so after running all the commands, a keyboard interrupt can be used to kill the process.
